1. Our Mission, Goals and Values

Our Mission

To help each student discover and develop his potential fully, to promote his development as a whole person by providing a balanced education in the moral, intellectual, physical, social and aesthetic spheres and by providing a learning environment that is disciplined, stimulating and forward-looking.

Our Goals

- 1. To promote the learning of knowledge, skills and attitudes needed to meet the challenges of a changing world.
- 2. To broaden minds and to promote awareness that learning is a life-long process.
- 3. To develop an inquiring mind and the ability to find, evaluate and use information to solve problems and to encourage independent thinking and creativity.
- 4. To promote self esteem, positive attitudes and sound physical and mental health.
- 5. To promote respect for others and constructive interpersonal relationships.
- 6. To promote better understanding of the forces that shape modern society, at the local, national and world levels, and to encourage a caring attitude and greater civic awareness.
- 7. To develop interests and talents and to promote appreciation of man's natural and cultural heritage.
- 8. To promote the on-going professional development of staff and to encourage a developmental culture within the school.
- 9. To seek to achieve the above goals by stressing active, first-hand learning experiences, by setting systematically planned, forward-looking policies and by working closely with parents and with the community.

Our Values

We share and seek to promote the following values and attitudes:

- ◆ Self discipline, respect for law and order and responsible behaviour
- ◆ Self respect, respect for the rights of others and appreciation of other people's achievements and efforts
- ◆ Active involvement in school life, sense of the school as a community and team-work
- ◆ A caring attitude and service towards others and towards the community at large
- ◆ A commitment to excellence in what we undertake to do
- ◆ A positive, forward-looking attitude
- ◆ Living in harmony with our environment

2. Our School

King's College was founded on its present site in 1926 and is basically a boys' school with a few girls admitted to Secondary 6 & 7. With a glorious history of over 84 years, it has graduates excelling in all walks of life and all over the world. (For general information about the school, please visit our official website or see the appendices.)

4. Our Teachers

Teachers' Qualifications

Highest Academic Qualifications attained by teachers

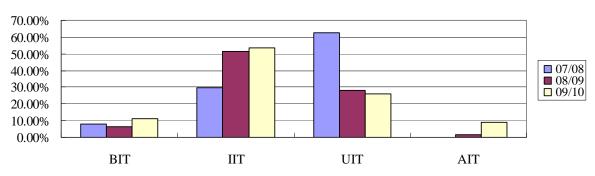

<u>Teachers with professional qualification, subject-training in the core-three subjects & meeting Language Proficiency Requirement</u>

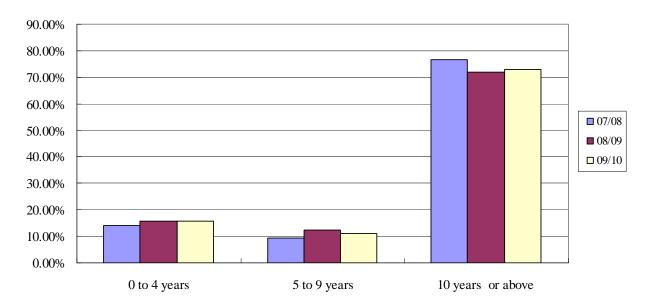

IT Competence

Teachers' Information Technology Competency

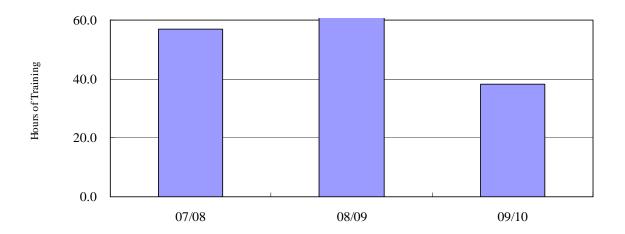

Teaching Experience

Teachers' Professional Development

Average training hours per teacher

Average number of training hours undertaken by a teacher: approx. 38.1 hours.

5. Achievements and Reflection on Major Concerns

Priority Task 1: Preparation & Implementation of NSS

Achievements

- 1. The school-based NSS curriculum was implemented smoothly in JS3& SS1:
 - The problems regarding timetabling and manpower were solved.

2. Curriculum in SS2 and SS3

Suggestions on the possible ways to deal with the problems relating to timetabling and manpower have been carefully looked into and discussed. Due to unforeseeable circumstances, continuous monitoring will be carried out to ensure that these problems could be timely and effectively tackled.

Arrangements regarding dropping of subject electives, adding of self-study electives, the selection of students to study Applied Learning courses were made. Parents and students were informed of the arrangements on different occasions, e.g. Parents' Days.

Final decision on subject combinations was agreed upon after a series of discussions, taking into account students' interest and preference over the subject electives the school offers.

3. Determining priority for taking an elective :

A system for determining the priority of a student applying for an elective has been devised. This has been clearly explained to students and parents. Enquiries from both parties have been properly answered and posted on the school webpage for reference.

4. Student Option Programme (SOP)

A software 'Student Option Programme (SOP)' was used for subject groupings, class structure and time-tabling. The satisfaction rate after the try out is over 80%, indicating that over 80% of students were offered the first three choices as their subject electives. 100% of students were allocated their first choice.

5. Student Learning Profile

The software system for the Student Learning Profile (SLP) has been running but some modifications need to be made to accommodate the problems that crop up with the large amount of data the systems needs to handle.

6. Pedagogy Study

The efforts to further improve pedagogy continued. With the members of the Pedagogy Committee and the Heads of Subject Departments taking the lead, teachers worked in groups to devise and try out methods to teach "difficult" topics. A resource bank including teaching materials and lesson plans was created and the collaborative culture the school seeks to create has been strengthened. (*Please see report on the achievements and reflections of the Pedagogy Committee.*)

7. Teacher training

All subject panels have sent teachers to attend training courses on NSS. Over 80% of teachers have received relevant training and are well prepared to teacher at NSS levels.

8. Communication with stakeholders

- > Communication with parents was maintained through meetings at parents' days and our school website on which our proposed curriculum, subject groupings, answers to parents' queries, etc. were posted. Parents expressed their views by mail or e-mail. Their enquiries were timely responded.
- > Progress of the preparation and the implementation of the NSS curriculum were reported to the SMC at the SMC meetings and to all staff at the staff meetings.
- > Students were informed about the NSS curriculum and the related issues at meetings. Surveys were conducted to collect S4 students' views about their subject preference before the school finalized the subject electives on offer at SS2.

9. Other major issues:

- Subject groupings The third survey for S4 students was conducted to find out students' subject preference. Based on the results, proposals on subject groupings in SS2 and SS3 were made and matters concerning manpower were also discussed. Our aim of offering as many students as possible their first few choices was achieved as nearly 80% of the students will get their first three subject choices.
- > Time allocation the number of periods for each subject elective was agreed upon after several rounds of consultation with staff members. All subjects the school offers meet the requirement of number of lesson hours prescribed by the EDB for a period of three years for the implementation of the NSS curriculum.

Reflection

- 1. The NSS Committee will continue to work towards a smooth transition to NSS, paying particular attention to the timetabling of SS2/SS3, accommodation and class size. Any proposals regarding curriculum change, subject groupings, deployment of teachers, etc. will be made known to the stakeholders concerned to allow exchange of ideas to work for the general good of our students.
- 2. It is necessary for the committee to continue to evaluate the implementation of the school-based NSS introductory courses at JS3 and SS1 and co-ordinate the efforts to tackle any problems that may arise. The committee can also take the lead to motivate teachers of different subject panels to share their experience gained with regard to teaching methods, preparation of teaching materials, assessment modes, etc.
- 3. More efforts have to be spent on exploring effective teaching strategies to raise the quality of teaching and implement the NSS curriculum successfully.

Priority Task 1A: Study on Pedagogy

Achievements

- 1. The culture of professional sharing has been strengthened:
 - > Many teachers now consider co-teaching, designing lessons and teaching materials together, making suggestions to fellow colleagues a good way to enhance teaching effectiveness,
 - > Good practices as well as areas for improvement are discussed at panel meetings. Members are encouraged to incorporate these in their teaching.
 - A collection of resource materials and lesson plans has been archived for teacher's reference.
 - > Students are accustomed to having co-teaching lessons and co-operated very well with the teachers.
- 2. There have been some obvious changes in the teaching approaches:
 - A student-centred approach is employed in a greater number of lessons. More opportunities are provided for students to interact with each other in group discussions and role-plays. As a result, student participation in the teaching and learning process has significantly been promoted.
- 3. A professional attitude towards collaborative lesson preparation has been developed:
 - > Many teachers welcome the suggestion that a "difficult" topic should be tackled collaboratively and view it as a meaningful challenge. They believe that the lesson plans, the teaching materials and the experience will all be useful to them in the future.
 - > In designing a series of lessons of a unit, many teachers have paid greater attention to students' prior knowledge and the different levels of thinking required at the various stages of the lesson. They have built in the design the need for pre-lesson preparation and the scope for further pursuit to enhance students' learning initiative, thus developing their life-long learning capability.
- 4. Professional support has been given to teachers:
 - Panel heads played a more proactive role in bringing about changes in the classroom. They gave advice to their panel members on choice of topic, explained the characteristics of an effective lesson and introduced teaching strategies and good practices they wished to promote. Discussion of good practices in the classroom was a major agenda item at panel meetings.
 - > The Pedagogy Committee held meetings to discuss the characteristics of an effective lesson. The Committee members attended meetings of collaborative teaching groups and gave them support and advice in the process of choice of topic, devising teaching strategies, gaining feedback, etc. They also led discussions at evaluation meetings, helping the groups to review their achievements and areas for improvement.

Reflection

- 1. The good response to the suggestion of choosing a 'difficult' topic indicates that teachers, in general, welcome meaningful challenge.
- 2. For the successful implementation of NSS, teachers have to develop a whole range of effective strategies. Teachers as a whole come to share the view that to facilitate a paradigm shift from a teacher-centred approach to a student-centred approach, greater emphasis on interactive learning and the promotion of learner independence are essential.
- 3. This year, most of the collaborative groups chose the same class S4A for co-teaching. We

- suggest that teachers may attempt their co-teaching practice in other classes particularly the ones with a wider learning diversity.
- 4. Some of the lesson demonstrations were too ambitious. The teachers wanted to incorporate a lot of things in one single lesson. It is advised that the theme(s) of the lesson demo should be clear and achievable.
- 5. Besides, it was found that a few groups tended to use the old-fashioned teacher-centred approach rather than student-centred one. The committee members and the panel heads will pay greater attention to this issue while having discussion at meetings with the teachers.
- 6. Some new teachers, not being familiar with other teachers, tended to form the collaborative groups among themselves. It would be a good idea to require the collaborative groups to have a good mix of "new" and "old" teachers to facilitate more meaningful exchange of experiences and knowledge. In addition, teachers with more teaching experience should play a more active role and guide the new teachers in the co-teaching exercise. The workload should be shared evenly among all group members.
- 7. As commented in the previous evaluation report, some teacher observers tended to provide only positive comments. They should be reminded that suggestions are made for the professional development of their colleagues and for mutual benefits.
- 8. This year the panel chairs are requested to play a more active role in the lesson study and it has clearly revealed that their involvement serves to give the whole lesson study exercise a higher profile. In future lesson study exercises, it is necessary to "groom" the panel chairs with the ultimate aim of having them to take over the work of the Pedagogy Committee. Some exemplar lesson plans can also be highlighted by the Panel Heads for promoting effective learning and teaching.

Priority Task 2: Enhancing Students' Self-discipline

Achievements

- 1. The School Regulations and Dress Code were revised:
 - Questionnaires were distributed to teachers, representatives of the Student Union and the Prefect Body in late June 2009 to collect their opinions on School Regulations and Dress Code.
 - > The 1st draft of the revised School Regulations and Dress Code was sent to every student for discussion in the 'Student Discipline Forum'.
 - > In the 'Student Discipline Forum', the rationales behind the formulation of the school regulations and the interpretation of the rules were discussed. Students were invited to express their views on the revised School Regulation and Dress Code.
 - > The hard-copy of the revised School Regulation and Dress Code was sent to students in November 2009. Amendments to relevant regulations were made taken into account the opinions expressed by students at the forums.

2. Classroom Code

- > Students of each class together with the Form-Teacher composed their own 'Classroom Code' at the beginning of this academic year. The set of rules so agreed upon between students and teachers strongly promoted a sense of ownership among students in the class.
- Every student was asked to take a pledge and to sign on the Classroom Code. The signed Classroom Code was posted on the Notice board. Periodic discussions between students and class teachers were done to evaluate the effectiveness of the Code.

3. Student Mentorship Scheme & Fig Boy Scheme

- > Thirty-four Fig brothers and sisters were appointed as student mentors to help S.1 students adapt to their new secondary school life.
- > Trainings on counseling, interpersonal relationship and anti-drug resources were given to all student mentors by the Liaison Officer of the Western Police Station and social workers from TWGH CROSS centre.
- A quiz contest aiming at promoting positive peer influence in tackling drug abuse was organized for all S.1 students in December 2009. The response was positive and students had a better understanding of how to tackle the situation when they met with one.
- After-school tea gatherings were organized from March to May to let S.1 students talk about their problems encountered in secondary school life. Advice was given by mentors and on the whole the mentors maintained a trusting relationship with S1 boys as revealed in the activities they had throughout the school year.

4. Self-discipline Competitions

- The awareness of self-discipline was aroused among students through essay competition and sharing in Morning Assembly.
- A 'Notice Board Design Competition' with the theme of 'Self-discipline' was held in the 1st term.
- > A drop of 231 counts of late submission of homework in this year compared with that of the last academic year, showing an impressive improvement.
- The 'Classroom Discipline and Cleanliness Competition' was organized twice in this year. Some classes were quite concerned about the marks given by teachers. They behaved well in class so as to ensure that their class could score a higher mark. This competition was found to be effective in improving the learning environment and provided a good reference for Form-teachers to take follow-up action.

> One student won the 2nd runner up and two students won merits in the 'Anti-drug Essay Competition' launched by the Rotary International and the Society for the Aid and Rehabilitation of Drug Abusers.

5. Talks and activities

- > Talks on anti-drug abuse were organized for all students in the 1st term and they were invited to sign their name on pledge cards and wore a Heart Knot to show their commitment to say 'No' to drugs.
- > S.1 and S.2 students were arranged to visit Hong Kong Jockey Club Drug InfoCentre. The visit featured real life cases of drug-addicts and invited ex-drug-addicts to share their past experience and the improvement in their life after having given up on drug abuse. In the discussion session, our students talked about the best tactics of resisting temptation of drug abuse. They carried home a very clear and positive message on drugs and they are expected to spread the messages among their peers and the people around them.
- > All S.1 students were invited to join the 'Largest Finger Painting Anti-drug Activities' 齊創造世界紀錄向毒品說「不」. They were witnessed by the Chief Executive and broke the Guinness World Record with a giant finger painting to promote the anti-drug message at the Victoria Park. Our students were led by Mr. Donald Tsang to make a pledge together, symbolizing their commitment and determination in fighting drug abuse.
- > Speakers from the 'Anti-triad Unit, Hong Kong Police Force' and 'The Society of Rehabilitation and Crime Prevention' were invited to give talks to our S.1 to S.4 students before the summer holidays. Through the talks and activities, our students have learnt the methods to avoid being tempted by the triad.
- 6. A whole school approach was adopted to enforce school regulations.
 - A briefing session on classroom discipline was arranged for all new teachers during staff induction.
 - > The School Regulations and Dress Code were clearly explained on the First Staff Development Day to ensure that all teachers and teaching assistants had a clear idea on what is acceptable in school and maintain the uniformity in punishment.
 - > All S.1 students and their parents were briefed on the School Regulation and Dress Code on the S.1 Parents' Day and Orientation Day. The importance of observing school regulations was also emphasized in the S.2 to S.7 Parents' Days.
 - > 494 students (42.1% of the total students) with record of 'no conduct mark deduction' throughout the whole academic term were awarded a merit point as an encouragement to good discipline.
 - 9 students with mild offences were invited to join the 'Self-Improvement Scheme'. They were required to take the initiative in improving their behaviour and made a plan to serve their classmates and schoolmates. All the invited offenders can have a reduction of the punishment received after achieving their goals.

Reflection

- 1. With the implementation of 334 New Academic Structure, there is a need to re-structure the hierarchy of Prefect Body, brining in a new Vice Head Prefect at Secondary 5.
- 2. Greater involvement of the Discipline Committee on the promotion, selection, training and supervision of the Prefect Body is needed to improve the present system of recruiting prefects, making sure that students selected could really serve as role models for their schoolmates.
- 3. The effectiveness of the Classroom Code can be evaluated in the Classroom Discipline and

Cleanliness Competition. Form teachers should review the Classroom Code with the students at regular intervals.

- 4. Only 42.1% of the students have no deduction of conduct mark throughout the whole academic year and awarded a merit point to recognize their good behaviour. Students should be reminded of unruly behaviour commonly committed by schoolmates at the beginning of the academic year to allow them to have a clearer idea of what they have to observe being a student of the school.
- 5. More effort should be put in to positively reinforce good behaviour among students and develop their sense of responsibility. The possibility of introducing a system to award good practice will be deliberated.

Priority Task 3: Enhancing students' initiative in learning

Achievements

- 1. Our students develop a proactive attitude towards learning and take on the responsibility to monitor and evaluate their own learning progress.
 - > A total of 187 students successfully fulfilled the criteria for the application of the Enhancing Students' Learning Initiative Scheme.
 - > Many students set realistic targets, conducted evaluation and self-reflection seriously throughout the school year.
 - > A survey on students' reflection on target setting at the end of the year reviewed the following:
 - ♦ 78% of the students set targets according to their self-reflection.
 - ♦ 71% of the students agreed that a clearer planning could be made with the help of their parents and Class Teachers.
 - ♦ 70% of the students claimed that they had achieved their targets set on the three domains.
 - ♦ 68% of the students agreed that the Enhancing Students' Learning Initiative Scheme could provide opportunities for them to get improvement in the three domains.
 - > A number of talks and workshops were organized to promote awareness and enhance students' ability of taking initiative to learn.
 - ♦ A talk on goal setting promoted the awareness of the importance of time management and planning on self-study for S1 and S2 students. Over 80% of the students showed that the talk helped them enhance their self management skills in their studies.
 - ♦ A workshop for S3 students enhanced the importance of goal setting and self management. Most of the students actively participated in the workshop and were inspired to plan and make decision at crucial moments in their future life.
 - ♦ The talk on planning on OLEs for S4 students helped them set targets for non-academic learning and adjust their progress throughout the year. To cultivate the habit and develop their skills of self-evaluation, S4 students conducted evaluation on their OLEs near the end of the school year and reflected on the most impressive thing they had learnt during their OLE activities. Students displayed positive attitude in these exercises.
- 2. The incorporation of the study skills, critical thinking skills and presentation skills etc. was carried out according to the plans of Subject Departments.
 - Different skills (such as note-taking, scanning and skimming, vocabulary building, information search and sorting, etc) were being taught and practised both in class and in extended learning (such as individual or group presentation, projects, public speaking, sharing in King's Morning Assembly, etc.) Teachers observed that majority of the students could make use of the skills in expressing and exchanging their ideas during lessons and applied the study skills acquired in pre-lesson preparation, assignments and projects.
 - The talks and workshops conducted by the Consumer Council for S1 and S2 students facilitated students' learning initiatives. More than 60% of the students agreed that they had learnt and understood some valuable skills (e.g. topic selection, data collection, presentation skills, collaboration skills, and critical thinking skills). Over 70% expressed that they would use the skills they learned in other learning areas. Many students indeed proposed innovative ideas in topic selection and presentation of their projects and managed to tackle the project from new perspectives. Their achievements were recognized as out of the 21 groups nominated to join the

- Consumer Culture Study Award Scheme, 29 and 41 students won the Certificates of Merit with (i) Excellent Performance and (ii) Good Performance respectively. To further acknowledge their good performance, a Most Creative Award was presented by the school to the project groups which (i) displayed originality and (ii) adopted a unique and interesting approach.
- Two groups of senior form students demonstrated outstanding self-learning initiative and skills when they prepared for various Science projects and competitions. They presented original and inventive ideas when proposing their hypothesis, employed creative approaches in designing and conducting the experiments; most importantly, they displayed persistence and perseverance throughout the whole process of self-learning. Teachers and the old boys who gave them support were impressed by their proactive learning attitude. It is indeed rewarding that they won various awards, including the highest award of the Hong Kong Students Science Project Competition, Championship in Senior Invention Division, by the group researching on Hexose's Oxidation Produces Energy (HOPE).
- 3. The culture of using IT for self-learning was enhanced.
 - Thirteen subject departments provided teaching material in the Intranet for students to download and learn. Seven subject departments provided online assessment or assignment in the Intranet. Thirteen subject departments sent emails or announcements to students via the Intranet. The use of the Intranet to deliver interactive learning material and notices to students is common in different subject panels.
 - S1 students were given a lesson on the use of e-learning resources at school, after which most of the students were able to apply the skills taught.
- 4. Students' initiative in learning was sustained as ample opportunities were provided to display good assignments of critical thinking and creativity and sharing of experience and feelings of successful self-learning work and project learning throughout the school year.
 - Besides, one group of S3 students who won the Gold Prize and the Most Creative Prize (their creative product is a magic pen with a magic correction fluid which can erase ink without leaving a mark on the paper) in the "Youth Creative Products Enterprise Competition" organized by the Boys' and Girls' Club Association of HK last summer was invited to share their learning experience with participants of the Competition from all Hong Kong schools this year. This honour certainly enhanced their proactive and positive attitude towards learning.

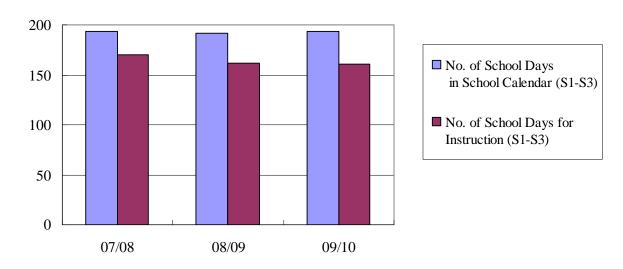

Reflection

- To redress the lack of a systematic framework for the development of self-learning skills among students, a curriculum across KLAs for a structured development and enhancement of self-learning skills among students will be constructed in order to introduce and consolidate major self-learning skills at appropriate levels (Junior Secondary and Senior Secondary) of the academic structure.
- 2. To cater for the diverse learning ability among students, more efforts have to be made on exploring effective strategies to enhance the learning initiatives of the gifted students and the lower achievers.
- 3. Even though 57% of the students stated that they were qualified to apply for the Enhancing Students' Learning Initiative Scheme Award, they could not fulfil all necessary requirements. Many of them, especially the low achievers, found that they did not have enough time to achieve all the criteria. Meanwhile teachers suggested that some of the

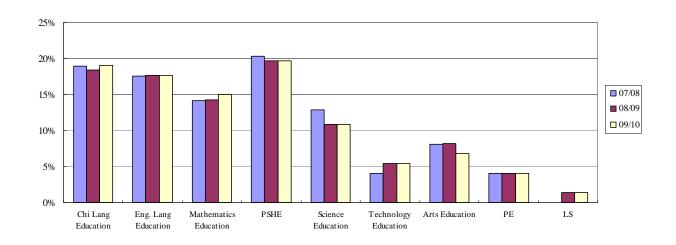

- criteria were really challenging. The scheme needs refinement so as to motivate all students to participate in it.
- 4. Teachers observed that time and self management was the major problem our students encountered. It is advisable to give more examples for them to choose on target setting. Closer guidance would have to be given classes or individual students with lower motivation or weaker abilities. In addition, to remind students of the targets they have set and to enable them to make records at any time, a handy Enhancing Students' Learning Initiative Scheme booklet would be compiled and students would be required to keep the booklet properly.
- 5. The planning exercises of the ESLI Scheme and that of the OLE held at the beginning of the school year could be merged into one so as to avoid redundancy and that students may have a comprehensive review and consideration when they make their plans.
- 6. It is recommended that the School would continue to adopt Enhancing Students' Learning Initiative as a major concern for the next school year. The Committee would implement and evaluate the effectiveness of the ESLI Scheme and co-ordinate efforts among all staff to make improvement to the areas mentioned in this section.

6. Our Learning and Teaching

Number of Active School Days

Lesson Time for the 8 Key Learning Areas and Liberal Studies (S.1-3)

There are 49 45-minute teaching periods in a 7-day cycle, including one form teacher's period with main focus on students' civic, moral and value education.

Students' Reading Habit

Percentages of Students Borrowing Reading Materials from the School Library

	08/09			09/10

The school curriculum is broad and well-balanced with clear and concrete goals related closely to students' whole-person development. It is designed in line with our mission to facilitate life-long learning and the aims of education espoused under the education reform. Due emphasis has been put on students' intellectual and personal development while at the same time positive attitudes and values are inculcated.

This year continuous effort has been made to prepare for the full implementation of NSS, focusing chiefly upon the operation and arrangements concerning subject electives and the allocation of subject electives to students. Extensive discussion among teachers was held on related issues including curriculum design, implementation of Other Learning Experiences (OLE), ways of reporting for Student Learning Profile (SLP), teacher training, classroom accommodation and time-tabling to ensure a smooth transition. The 2-year school-based NSS curriculum introduced in 2008/09 school year was successfully and smoothly completed. Continuous evaluation done over the 2-year period reflected that students were given a good chance to have an understanding of the NSS subject electives on offer. A series of surveys was conducted to collect information on students' preferences before the school finalized the number of subject electives and the number of subject groups for each elective at S.5 and S.6. To cater to the interest of students and to ensure fairness in the allocation exercise, different systems of allocation were tested. Trial runs were conduct to test the validity and the reliability of the systems employed. With the adoption of the Student Option Programme (SOP) system, all students were offered their first choice while the overall satisfaction rate for being allocated the first subject options was over 90%. Arrangements have also been made to allow current S.5 students to study under the NSS. Issues regarding subject electives on offer, block arrangements, classroom accommodation, teacher training, etc will be subject to evaluation and review.

Through subject-based project learning and integrated-curriculum project learning, students were given the chance to train up their generic skills, particularly collaborative and presentation skills. In order to enhance students' learning initiatives in project learning, the Consumer Council was invited to give a series of talks and workshops including a mass lecture on topic selection and two workshops on creative thinking and presentation skills. Among the 21 groups nominated to join the Consumer Culture Study Award Scheme, 29 students were awarded Certificates of Merit with Excellent Performance while 41 awarded Certificates with Good Performance. To promote creative education in school, a Creative Design Competition with the theme 'Improve Our Lives' was held in which students were required to invent a product and explain their designs during morning assembly. Many innovative designs were submitted and students' performance in the competition was very impressive.

The morning reading sessions on Wednesdays, the reading award scheme together with the activities provided by the school library continued to help promote a positive attitude towards reading. Famous authors, including Mr. Chen Yun and Ms. Wu Yin-ching, and an old boy, Mr.

Chan Wing-luk, were invited to give talks to students of different levels. These talks covered different areas of interests and were warmly received by students. This series of activities helped to promote an inviting reading atmosphere in the school.

The Civic and Moral Education Committee planned and coordinated a series of programmes to be conducted in form-teachers' periods, based upon the theme of 'Self-discipline and Self-learning from the Bottom of our Hearts'. The programmes aimed to help students develop a better understanding of their self and an awareness of their needs, potentials and goals, and ultimately students improve their relationships with others, be aware of their civic rights and responsibilities and have a caring attitude towards the community around them. Fund-raising activities to help the victims of the earthquake at Qinghai and the 'One Person, One Red Packet Campaign' were held aiming at alerting students the importance of giving care and love to others. A handsome sum of money was raised through these activities with strong support from both parents and students.

Greater emphases were given to the promotion of national education in the school this year. With the setting up of The National Education Team, more focused activities were organized. Students were given the chance to join exchanges tours organized by the Education Bureau and other organizations. While a group 18 students joined the exchange tour to Beijing and Shanghai in early February 2010, another group of students visited the Shanghai Expo in August. Flag-raising ceremonies were held on special occasions. Students were selected to join the training course on flag-raising etiquette. Throughout the year, students participated in different kinds of inter-school quizzes on national education. They have, through these activities, acquired better knowledge of our mother country and the role and responsibility they have to take up as a Chinese national.

Information Technology (IT) has been extensively employed in both teaching and learning. To facilitate a more effective use of IT in education, computer cabinets for desktop PC's and LCD projectors in all classrooms were replaced. Students and teachers continued to make good use of the e-learning platforms which enabled them to communicate with each other via announcements and email messages. On-line assignments and quizzes promoted self-learning and they were found to be effective in improving students' performance. Video-conferencing with schools in Mainland China were more frequently held this year, apart from allowing students to build up a closer relationship with the participating parties, students were able to learn from others' experience through exchange of views and discussion on issues of common interest.

The school continues to make serious effort to build up an environment conducive to the learning of the English Language. Apart from the activities launched by the English Society and the English in the Main Stream working group, the school keeps pursuing a language-on-campus policy with the support of all teachers and students aiming to make English the language for both formal and informal communications in and out of classrooms. Most students, given many and

varied opportunities to use English in school, can use English fluently and meaningfully in activities and daily communication.

All our teachers are qualified, and have good mastery of subject knowledge and sound teaching skills. Except for a small number of them, they are all professionally trained. All teachers of English Language and Putonghua have met the Language Proficiency Requirement. A great majority of the teachers displayed exceptional commitment and conscientiousness and welcomed the changes brought about by the implementation of the NSS curriculum with open arms. To keep themselves informed of the current changes in education, teachers were eager to attend professional development courses and served as markers or oral examiners in public examinations. They showed great enthusiasm in promoting deep learning, putting emphasis on enhancement of students' learning initiatives, adopting a learner-centred approach, etc. To answer to the problems brought about by learner diversities, teachers were eager to adopt diverse teaching strategies and prepare different teaching materials to cater for the needs of students. Collaborative teaching among teachers has continued to make good progress and new strategies were developed to make teaching and learning more effective.

Our students, on the whole, are keen on acquiring various generic skills and taking up new challenges. They are creative and embrace changes with delight. They are attentive and eager to learn. They are highly adaptive to a multitude of learning strategies, coupled with a strong will to make good progress in their work. They are serious in completing their learning tasks and doing their work. They make good and effective use of various resources that they have access to (e.g. extensive reading, web-browsing, eClass, project work and group learning, etc). They are active in expressing views, asking questions, taking part in discussions, exchanging ideas, working collaboratively to solve problems and sharing learning outcomes. They enjoy working with their peers and treasure the opportunities to learn from each other. For the less academically able students, the school provides support aimed at helping them to improve their performance in their studies and more importantly building up their confidence and arousing their motivation to learn through enrichment classes and peer support programmes.

7. Support for Student Development

The School adopts a whole-school approach to student development and provides a comprehensive framework for student-focused support. A vast array of activities was organized by the different committees and functional groups throughout the year. The programmes aimed at fostering students' personal, affective, social and cultural development and were well received by the students.

The School emphasizes self-reflection and self-discipline and has set clearly defined behavioural guidelines through the school regulations, classroom codes and a conduct mark system allowing penalties as well as rewards. The teachers on the Discipline Team, supported by school prefects elected by both teachers and students, are conscientious in helping students develop self-discipline and at the same time training them to be law-abiding citizens. This year, the launch of a series of anti-drug programmes echoed with the government's urge to make schools free from drugs and to have students saying 'no' to drugs. Our drug-free campus is filled with students who are, in general, well-behaved but their self-discipline and character building can further be enhanced.

The Counselling Committee launched a range of structured programmes and provided individual counselling to students with the joint efforts of all teachers, in particular, the form teachers, and with the professional support of the school social worker. Greater emphasis was laid on enhancing students' self-esteem and building up an elaborative set of positive psychological strengths. Strong support was given to students through programmes such as orientations for S1 and S6, and the Fig Boy Scheme. Before the school year started, an adaptation programme and an English Camp for all S1 students were organized to prepare them to adapt to the new learning environment with English being used as the medium of instruction.

To facilitate a whole school approach to integrated education, the Counselling Committee played a significant role to facilitate effective communication among the school management, teachers, parents of students with special education needs (SSEN), the school social worker and the officers from the Special Education Section of the EDB to give support to the students concerned. Using appropriate resources, the team conducted professional support services to the SSEN, talks to parents, and workshops for peers, which aimed at cultivating an inclusive learning environment. Some counselling teachers as well as teachers from different subject disciplines attended courses on Teacher Professional Development on Integrated Education. While being confident of our commitment to fulfilling integrated education, our capacity to accommodate the full range of individual learning differences among our students still require further enhancement.

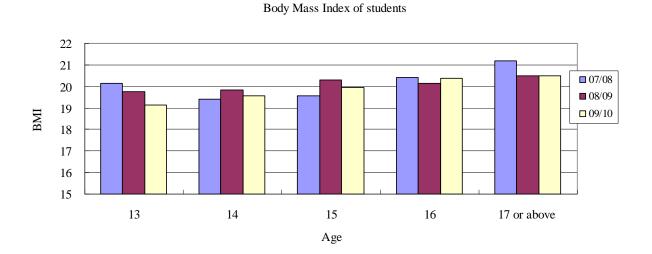

Our school seeks to provide an environment that encourages and promotes a balanced moral, intellectual, physical, social and cultural growth of students. To this end the Civic and Moral

Education Committee conducted a series of programmes to be implemented in the form-teachers' periods throughout the year. The programmes provide opportunities for students to examine and discuss a wide variety of topics under the guidance of their form teachers. Emphasis has been placed on providing learning activities that encourage students to think critically and to make sound judgments and sensible choices.

The Careers Committee prepared a series of careers guidance programmes to assist students in developing 'Self Awareness', 'Opportunity Awareness', 'Decision learning' and 'Transition Learning' at different levels of their studies. To equip students with career awareness and career exploration needed for their life-long career planning, students were encouraged to join talks and programmes organized by different organizations and institutions. Through these activities, students were given job-shadowing opportunities, training on business skills and more extensive exposure to the world of work.

The Health Education Committee developed, monitored and reviewed programmes for promoting good health among students. The Committee liaised with different organizations for the conduct of activities throughout the year. Health Education Workshops for S1 and S2 were run by officers from the Health Department while a number of sex education workshops for S1 to S3 students were organized by The Boys' and Girls' Club Association of Hong Kong. Serious effort has been made by the Committee to inculcate among students with messages to stay away from drugs, and the ways to prevent the spread of infectious diseases.

Students' Body Mass Index (BMI)

The Health Education Committee and the Physical Education Department co-organized activities like a talk on BMI and a health and fitness improvement scheme. Those students identified to be obese were invited to join the scheme and improvement for the BMI was made after students committed themselves to doing a series of health related exercises as advised. To further promote the importance of leading a positive life and healthy lifestyle, talks and improvement scheme on enhancing students' health and fitness will be conducted in the coming school year.

Induction programmes for joining in the different uniformed groups, musical instrumental classes, as well as ECA clubs were held at the beginning of the school year. Student officials made use of the opportunities to develop collaborative and inter-personal skills through organizing club activities and house competitions. Members discovered their interests and talents through participation and a stronger sense of brotherhood was nurtured.

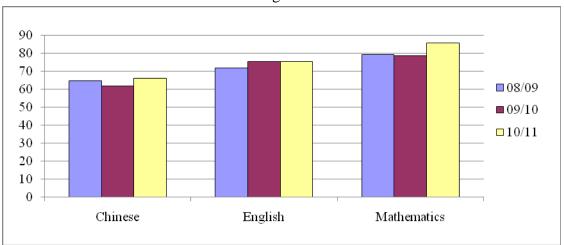

Students were strongly encouraged and supported to take part in other learning experiences, such as participation in overseas and mainland exchange programmes and study tours, leadership training programmes and inter-school, regional and national competitions of various types, which broadened their horizons and widened their experience. Students were also given chances to organize class-based activities to celebrate Christmas and during the post-examination period. Using the framework provided by the Committee on Enhancing Students' Learning Initiative and OLE Committee, students were to maintain a balance in their learning experiences and plan their whole person development. Students' awareness of the need to plan and reflect on their own learning and commitment to community service were strengthened but there was still room for improvement.

The School aimed at nurturing future leaders by providing leadership training for prefects and Student Union officials and chairpersons of different clubs and societies, giving them the chance to take charge of some major functions, such as planning and organization work for Open Days, serving as master of ceremony at Speech Day, assisting as tour leaders on guest visits, etc. The school will continue to provide a larger number of students an opportunity to plan and to run the major school functions to enhance their leadership abilities.

9. Financial Summary (1.9.2009 – 31.8.2010)

				Income(\$)	Expenditure(\$)
I ESCI	BG				
((a)	Non	-school specific grants		
		2	ECA funds - GSS (Including an amount of \$66,660.00 collected from students for 2009-10 school year) Baseline reference	136,608.00	104,318.60
			provision	394,185.00	339,123.04
			Sub-total:	530,793.00	443,441.64
((b)	Scho	ool specific grants		
		1	Capacity Enhancement	366,246.00 458,927.00	333,673.65 986,482.67
			Sub-total:	825,173.00	1,320,156.32
II Teac	her	Relie	ef Grant(TRG) TRG - GSS	192,298.00	137,944.00
			Sub-total:	192,298.00	137,944.00

III Other Non-recurrent Grants		
1 Teacher Professional Preparation Grant 2 Senior Secondary Curriculum Support Grant 3 New Senior Secondary Curriculum Migration Grant	- 421,140.00	131,080.00 141,715.40 45,362.66
Sub-total:	421,140.00	318,158.06
IV School Funds (1) Fees collected for specific purposes Sub-total:	210,600.00 210,600.00	254,760.90 254,760.90
Grand Total:	2,180,004.00	2,474,460.92

^{*} Deficient amounts were covered by amounts brought forward from the previous school year.

10. Feedback on future planning

- 1. To prepare students to be proactive and independent learners, a curriculum across KLAs for the structured build up and consolidation of study skills will be constructed.
- 2. To strengthen the self-discipline of the students, greater autonomy for constructing their own behavioural codes will be given. Positive reinforcement of good behaviours will also be deliberated.
- 3. Students' awareness of the value of community service will be promoted through experience sharing and a broader range of service opportunities.
- 4. For the development of a healthy lifestyle and harmonious relationship among students, a broad and comprehensive Health Education programme will be introduced to enable students to make informed decisions about their ways of life and adopt positive and accommodating attitude towards others.
- 5. To cater for the diverse learning ability among students, more opportunities will be provided to the higher ability students to stretch the learning potentials and capacities. Greater attention will also be paid and measures formulated to enhancing the learning motivation and self-confidence of the weaker ones.
- 6. The current NSS system adopted by the school will be reviewed. The effectiveness of the related NSS policies and that of the implementation of subject curricula will be evaluated.

Appendixes

Evaluation on the Use of Teacher Professional Preparation Grant, Capacity Enhancement Grant and Senior Secondary Curriculum Support Grant in 2009-2010 school year

Objectives/Plan Evaluation

Objectives:

- 1. To share the overall teaching and non-teaching workload (including administrative duties) so as to give space for teachers' professional development, curriculum development and teaching;
- 2. to enhance students' English learning proficiency
- 3. To assist teachers in preparing teaching and learning materials and form-teacher period materials (Civic and moral Education, Careers Education, Guidance and Counselling) and organizing ECA and OLE;

Plan:

- (a) Employment of an additional temporary teacher
- (b) Direct Re-appointment of 4 Teaching Assistants
- (c) Direct Re-appointment of an Administrative Assistant

- The employment of the additional temporary teacher provided relief for all teachers as there was a reduction in the total number of teaching periods for everyone.
- The S1 and S2 English and Chinese language teachers spent more time on giving support for the weaker students.
- English Teachers could spare more time on planning and implementing strategies to enhance English language environment.
- The Administrative Assistant provided essential relief for all teachers in non-teaching related duties including:
 - (a) secretarial duties
 - (b) assisting in preparation of school and student documents
 - (c) assisting in liaising with old boys
 - (d) assisting in PTA activities
 - (e) assisting in all examination-related matters
 - (f) assisting in inputting student data
 - (g) maintaining the school intranet
 - (h) collection of reply slips of circulars
 - (i) preparing logistics for major school functions so that teachers were able to concentrate curriculum planning and teaching.
- 1. Throughout the whole year, the TAs have provided essential assistance to teachers of the English, Chinese, Mathematics, Liberal Studies, IH, BAFS, Sciences departments as well as various functional committees in tasks including:
 - a. preparing teaching and learning materials,
 - b. helping the NSS curriculum development,
 - c. organization of extra-curricular activities,
 - d. preparing form-teacher period materials,

50

Objectives/Plan	Evaluation
	e. preparing OLE materials,
	f. conducting supplementary remedial classes
	for weaker students,
	g. taking junior form students to the Speech
	Festival Competitions,
	2. Assistance have also been given to other teachers,
	including:
	a. The TAs have, as a whole, taken up most of
	the lesson substitution. The total number of
	lessons substituted was 558.5. This provided
	space for the teachers to attend professional
	development courses and relieved the other
	teachers from taking up the substitution
	duties'
	b. The TAs have taken up some of the internal
	and public examination invigilation duties so
	that teachers can focus on marking the answer
	scripts and developing assessment for
	learning strategies.
	c. The TAs have shared the workloads related to
	the S1 Admission Interview.
	Besides a survey conducted to collect teachers'
	opinion, it was discussed and agreed in the 4 th
	Staff Meeting (2009/10) on 24 May 2010 that the
	school will continue to expend special funds on
	employing the same number of temporary staff.

【自我挑戰】成	10	90%	12/2009 -	7200	問卷、老師	學校社工、小	根據活動後的問卷調
長訓練計劃			4/2010		觀察	童 益會上	查,大部分的參加者
(中一及中二級						環中心	大致滿意戶外歷奇活
同學)							動。他們大都學習到
							團結、互相合作、互
							相信任以克服困難。
							此外,義工服務使同
							學認識到事前計劃的
							重要性、做義工要很
							大的耐性、需要勇
							氣、要有愛心、懂得
							大方、要很快反應、
							來服務有需要人士。
彩虹職志特工隊	15	95%	1/2009 -	\$2250	問卷、老師	學校社工、小	根據學校老師和社工
(中四及中五級			7/2010		觀察	童 益會上	的觀察,以及同學問
同學)						環中心	卷調查,同學表現非
							常積極,他們覺得整
							項活動結構完整、有
							心思及準備充足,能
							配合他們的實際需
							要。在活動中,同學
							能清楚知道會考放榜
							的程序,而模擬面試
							部分更加強他們面對
							會考放榜面試時的信
							心。整項活動,除讓
							學生學懂如何面對會
							考成績外,並且讓同
							學知道生涯規劃的重

							要性,更重要的是能
							為末代會校生提供心
							理支援。
							整體而言,同學認為
							此活動值得舉辦,部
							分同學希望加強講解
							各項的就業選擇之利
							弊。
一人一夢想學習	51 人	85%	10/2009 -	\$16, 925	問卷、老師	扶幼會-TEEN	1. 舞蹈課程:學生除
計劃			5/2010		觀察	賦演藝工作	了增進藝術感及創意
(中一 - 中七級						室、	外,學生在學習時溝
同學)						香港海洋公	通技巧也進步了。
						園學院、	2. 溜冰課程:學生除
						太古城冰上	接觸溜冰運動外,在
						皇宮	課程中透過不斷練習
							和嘗試,對自己認識
							增加外,抗逆力及自
							我形象也增加不少。
							3. 學生在參觀海洋
							公園中,學到物理和
							生態理論,加強了對
							保護大自然的觀念,
							並且擴闊了眼光。
			物明士	¢26275			

總開支 \$26375

備註:

- 1. 由於 2008-09 年度部分計劃因豬流感關係除消,有關預計開支調撥到今學年應用。
- 2. 對象學生: 指領取綜接/學生資助計劃全額津貼及學校使用 10%酌情權的清貧學生.

乙.計劃成效 (暫時觀察)

觀感						

丙. 對推行活動計劃的意見

在推行計劃時遇到的問題/困難 (可在方格上√超過一項)

\checkmark	未能識別對象學生(即領取綜援的學生);
\checkmark	難以甄選 10%的酌情名額;
\checkmark	對象學生不願意參加計劃;
	伙伴/提供服務機構提供的服務質素未如理想;
	導師經驗不足,學生管理技巧未如理想;
√	活動的行政工作明顯地增加了教師的工作量;
	對執行教育局對處理撥款方面的要求感到複雜;
	對提交報告的要求感到繁複、費時;
	其他(請說明):
